

TrackSlate™

Track what comes back.

An ultra-thin, reusable BLE location tag for returnable packaging, equipment, cases and other assets that move repeatedly between sites.

Up to 24 months

Service life

2 mm

Thin card profile

16 g

Weight

No SIM

No mobile data plan

Best suited to

- Returnable crates, totes and packaging
- Tool and equipment cases
- Rental and demonstration equipment
- High-value spare parts
- Roll cages and reusable transport items

How location works

TrackSlate is not a GPS or cellular tracker. Compatible nearby connected devices detect its BLE signal and deliver location sightings into GoAndTrack. Coverage and update frequency depend on the presence of compatible nearby network devices.

Fewer assets lost

A last sighting turns a quiet write-off into a recovery.

Less time searching

Teams stop walking yards and calling sites to find a case.

Better utilisation

Dwell and return-cycle visibility shows where containers idle.

How it works

1

Attach and assign the tag to an asset in GoAndTrack.

2

Compatible nearby devices detect the BLE signal.

3

GoAndTrack converts sightings into last-seen location, location history and supported geofence events.

What GoAndTrack adds

- One operational view alongside smart labels, GPS trackers and condition monitors
- Last-seen location and sighting history
- Geofence arrival and departure visibility
- Battery status
- Shipment mode
- AI-assisted investigation

Technical specifications

Connectivity	BLE
Battery	540 mAh Li-MnO ₂
Service life	Up to 24 months
Button	One power button
Buzzer	60 dB
Operating temperature	-20°C to 60°C
Dimensions	84.5 × 54.4 × 2.0 mm
Weight	16 g
Certifications	CE, FCC, RoHS

TrackSlate has no temperature sensor; pair it with a suitable condition-monitoring device when temperature or humidity evidence is required.

Service life depends on configuration, usage and operating conditions.

Request a TrackSlate™ pilot

Tag a single depot, route or container pool and review the sighting data before you scale.
